

WHY TRIMLIGHT IS THE CLEAR CHOICE

1

Protected in the shadows and away from harmful UV rays

Trimlight bulbs are pointed down to keep harmful UV rays from prematurely destroying the electronic components from excess heat and exposure.

2

Lights that protrude from the channel for the best visibility

Lights should protrude out of the channel to ensure 360 degree visibility and light spread. When lights are flush in the channel, the light is not visible from most angles.

3

Smallest size with the brightest capability

Permanent lights should be as small as possible to ensure that they are not as noticeable during the day. But bright enough to light up the house at night. A larger light is much harder to hide.

4

Channel that is elegant but allows for better maintenance

Channel is required to protect the system, while giving an additional architectural feature to the building. Channel should be designed for easy access without the need to remove the channel to maintain the system

5

Direct bulb and no lens

Exposing the entire bulb in full outside the channel has the most consistent color from every view point. A lens over a flat light will only reflect an inconsistent refraction of light.

6

Creates a wall splash that is consistent across the surface

When lights are not fully exposed, the channel will create a shadow of light. The splash of light on the wall is inconsistent and will create a spotty display.

FEATURES THAT ENHANCE YOUR EXPERIENCE

1

Easily choose up to 16 Million colors

With a simple finger swipe, a user can find up to 16 million different colors to display within the Trimlight system.

2

Preset Programs

Built in preset programs that allow a user to control their lights. Customizable colors, patterns, and movements will make your lights unique with an endless amount of options.

3

Simple sequence creation

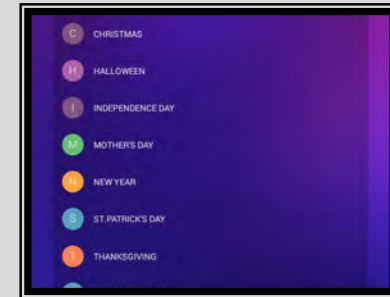

Simply drag one of our set colors, or your own custom color into the sequence bar for your own pattern. With a simple option to set that pattern into multiple different movements or nonmovement.

4

Saved library for favorites

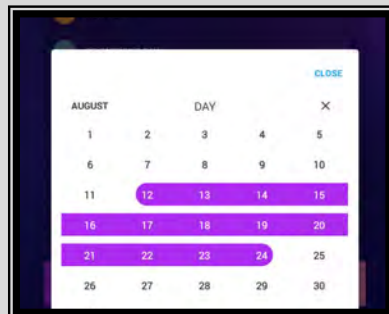

Saving patterns and naming them something memorable is important with all of this technology. Deleting ones that aren't used enough is also just as important. Easily save up to 30 different favorites to use all year long.

5

365 day calendar timer

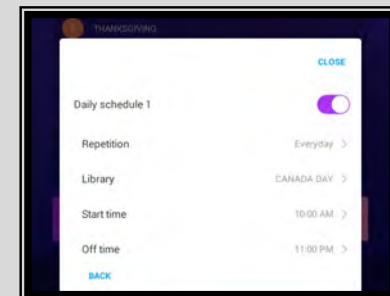

Setting up your entire year at one time saves you so much time! Make sure to schedule each and every amazing holiday or event that reoccurs every year. You don't need to remember, the Trimlight app will.

6

Daily Timer

Use our daily timer if you like to use your lights daily, and not just for the Holidays. You can set up to 2 different daily timers for each day.

THE #1 REASON TO GET TRIMLIGHT

LIFETIME GUARANTEE ON ALL PARTS

All parts are guaranteed for the manufacturers estimated lifespan of the parts. This amount of time is dependent upon the usage that the individual part sustains. If used just around the holidays, this amount could be upwards of 30-40 years. But if used nightly, this amount of time could be around 7-8 years. Lifespan of the controls can be affected by future technology changes.

(Ridge Channel Lights and Lights faced out or vertical have a limited 1 year warranty)

2 YEAR LABOR WARRANTY

Any labor costs to make repairs on manufacturer defective parts are covered in full for the first 2 years. This may include faulty bulbs, power supply parts, LED controllers, connections, aluminum channel finish, etc.

A SMALL SAMPLE OF OUR CUSTOMER REVIEWS

We love everything about Trimlight!! The showroom was impressive but most importantly, Johnny (?) was great!! He went above and beyond to make sure we had all the information required to make the right decision to purchase permanent lighting. After signing the contract on March 27, the first date available for installation was May 6th. Todd came out to the house to take measurements and get/got things right. The installers were on time and did a fantastic job!! Very pleased. Worth the wait!!

About the same price as a competitor that we looked at, and their system is so much better. The lights got installed earlier than scheduled, the install took only a few hours, the track perfectly matches our eaves so the lights are unnoticeable during the day, and they look gorgeous at night. The app is super easy to use, and has so many options.

★★★★★ a year ago -

TrimLight was quick to come and bid, and got my lights installed much faster than anticipated. Randi was excellent with communication, and although the pricing for permanent lights is much higher than regular old bulbs from your local hardware store, the options and longevity far outweigh the cost. My house is super tall and sloped, so my wife appreciates me not having to go up on the roof!

When you see the lights come on for the first time at night, you can't even say "Wow" because it is so breathtaking. The installation team was top-notch. The way the product blends into the existing trim is just amazing.
