

INTRODUCING: TRIMLIGHT 3L

The decision by Trimlight to innovate by **offering an option with three diodes** while still retaining our famous one diode option is rooted in our commitment to customer satisfaction. We recognize that every customer has unique preferences and financial requirements when it comes to outdoor permanent lighting. By offering both choices, we ensure that we can cater to a broader spectrum of customer needs.

Trimlight 3L

3 DIODES

The protruding diffused lens that houses the 3 SMD LED's is the same great size as the original and 33% brighter.

Same brightness and luminosity as the commercial 30mm light. Amplifying every 50-60 lights

.9 Watts per light with 50,000 hours lifespan

12-volt low voltage system provides energy efficiency extending the bulb's lifespan.

Trimlight Original

1 DIODE

The entire LED is outside the channel allowing the light to be direct without diffusion

Designed around the same brightness and wattage as a C7 LED

.6 Watts per light with 50,000 hours lifespan

12-volt low voltage system provides energy efficiency extending the bulb's lifespan.
