

TECHNICAL SPECS

Experience the Durability and Efficiency of Trimlight's Patented Lighting System

Our original light featured a single LED diode, but with the new Trimlight 3L, **comes with three!** This means that your Trimlight system will shine brighter than ever before! Trimlight's patented system is designed to withstand **tough weather conditions**, conserve energy and last for decades. Our high-quality LEDs are rated to **last 50,000 hours**, which is ten times longer than temporary lighting and uses only a fraction of the energy.

A protruding bulb from the channel that allows the light to be seen from more angles than a flush light, which provides a traditional holiday look.

AMAZING BULB DESIGN

- Our **12-volt low voltage** system provides energy efficiency extending the bulb's lifespan due to a lower heat dissipation requirement.
- The downward-facing lights **protect bulbs from harmful UV rays** while offering a stunning **wall splash display** that completely transforms the look of your home at night.
- Our **patented channel design** optimizes UV protection on the wires, enhances longevity, and adds a touch of architectural beauty to your outdoor space.
